CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/98)

1. Project Number(s)/Environmental Log Number/Title:

COUNTRY GARDENS II MAJOR USE PERMIT FOR A GROUP CARE FACILITY; P04-058; LOG NO. 04-02-053

- Lead agency name and address:
 County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666
- 3. a. Contact Marcus Lubich, Planner
 - b. Phone number: (858) 694-8847
 - c. E-mail: marcus.lubich@sdcounty.ca.gov.
- 4. Project location:

The project is located in the Fallbrook Community Planning Area in the unincorporated portion of the County of San Diego. The proposed site is located on the northwest corner of South Mission Road at 2800 Overland Trail (APN: 123-010-52).

Thomas Brothers Coordinates: Page 1047, Grid G/1

5. Project sponsor's name and address:

Karl and Barbara Zimmer P.O. Box 1219 Pauma Valley, CA 92061

6. General Plan Designation

Community Plan: Fallbrook
Land Use Designation: (3) Residential
Density: 2 du/ 1 acre

7. Zoning

Use Regulation: (RR2) Rural Residential

Density: 2 du/ 1 acre

Special Area Regulation: H: Historic/Archaeological Landmark

8. Description of project (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation):

The project is a major use permit for a group care facility. The project consists of a 16,780 square foot group care building with twenty-seven (27) suites that will support forty-nine (49) beds for a maximum of 49 residents. The structure will be single-story, wood framed stucco clad and residential in style. The site is currently vacant. Access would be provided by a driveway connecting to South Mission Road. The project would be served by sewer and imported water from the Fallbrook Public Utility District. No extension of sewer or water utilities will be required by the project. Earthwork will consist of cut and fill of 1,200 cubic yards of material. The project includes the following off-site improvements: improve South Mission Road (SF 1305) along the project frontage.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

The Fallbrook community and the neighborhood surrounding the site is generally characterized as gently-rolling hills with estate sized homes upon larger residential lots, production groves of avocadoes and citrus varieties, horticultural, ornamental and food producing nursery stock production, and other rural commercial agribusiness activities.

The parcel site is 2 acres in size and has been used historically for mineral extraction operations and has been excavated to a grade generally level with South Mission Road. A natural drainage is located at the very southern tip of the project site, across Overland Trail, a private road.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	Agency
Landscape Plans	County of San Diego
Major Use Permit	County of San Diego
Grading Permit	County of San Diego
Improvement Plans	County of San Diego
General Construction Storm water	RWQCB
Permit	
Water District Approval	Fallbrook Public Utility District
Sewer District Approval	Fallbrook Public Utility District
Fire District Approval	North County Protection Fire District

Marcus Lubich

Land Use/Environmental Planner

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages. Aesthetics Agriculture Resources Air Quality Biological Resources Cultural Resources Geology & Soils Hazards & Haz. Materials Hydrology & Water Quality Land Use & Planning Population & Housing Mineral Resources Noise Transportation/Traffic Public Services Recreation **Utilities & Service Systems** Mandatory Findings of Significance **DETERMINATION:** (To be completed by the Lead Agency) On the basis of this initial evaluation: On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared. On the basis of this Initial Study, the Department of Planning and Land Use finds \square that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared. On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required. May 15, 2008 Signature Date

INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 4 -

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
 - a) The significance criteria or threshold, if any, used to evaluate each question; and
 - b) The mitigation measure identified, if any, to reduce the impact to less than significance

I. AESTHETICS -- Would the project:

a) Have a substantial adverse effect on a scenic vista?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
valued highwa County a scen project the So	pact: Scenic vistas are singular vantage viewsheds, including areas designated ays or County designated visual resource Staff on August 1, 2005, the proposed ic vista and will not change the composite site is bordered on the north and west buth Mission Road. The site is located approximately 2.7 miles northeast of His will not have any substantial adverse effects.	as offices. Bas offices. Bas offices of the contract of the co	cial scenic vistas along major ased on a site visit completed by it is not located near or visible from an existing scenic vista. The gle-family residential, the east by mately 4.7 miles west of Interstate 778. Therefore, the proposed	
,	Substantially damage scenic resources, outcroppings, and historic buildings with		•	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less than Significant Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from Caltrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by County Staff on August 1, 2005, the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The project site is bordered on the north and west by single-family residential, the east by the South Mission Road. The site is located approximately 4.7 miles west of Interstate 15 and approximately 2.7 miles northeast of Highway 78. Therefore, the

proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

c)	Substantially degrade the existing visual surroundings?	l chara	acter or quality of the site and its
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: Visual character is the objective composition of the visible landscape within a viewshed. Visual character is based on the organization of the pattern elements line, form, color, and texture. Visual character is commonly discussed in terms of dominance, scale, diversity and continuity. Visual quality is the viewer's perception of the visual environment and varies based on exposure, sensitivity and expectation of the viewers. The existing visual character and quality of the project site and surrounding can be characterized as mixed use.

The project proposes a major use permit for a group care facility. The building will consist of one building to support forty-nine (49) residents. The structure will have the following features: single story, wood framed, stucco clad and residential-style. The project is compatible with the existing visual environment's visual character and quality because the property slopes from the western property line down to the east property line that fronts South Mission Road. This sloping condition separates the property from the residential development to the west. Other properties along South Mission Road are developed with Fallbrook Union High School, residential uses, and small businesses.

The project will not result in cumulative impacts on visual character or quality because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the viewshed surrounding the project and will not contribute to a cumulative impact for the following reasons: The project does not propose any development of steep slopes, and the proposed facility will be include setbacks and landscaping to blend the new structure into the surrounding neighborhood. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area.

d)	Create a new source of substantial light day or nighttime views in the area?	or gla	re, which would adversely affect
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: The proposed project will use outdoor lighting and is located within Zone B as identified by the San Diego County Light Pollution Code. However, it will not adversely affect nighttime views or astronomical observations, because the project will conform to the Light Pollution Code (Section 59.101-59.115), including the Zone B lamp type and shielding requirements per fixture and hours of operation limitations for outdoor lighting and searchlights.

In addition, the proposed project will control outdoor lighting and sources of glare in the following ways:

- 1. The project will not install outdoor lighting that directly illuminates neighboring properties.
- 2. The project will not install outdoor lighting that would cast a direct beam angle towards a potential observer, such as a motorists, cyclist or pedestrian.
- 3. The project will not install outdoor lighting for vertical surfaces such as buildings, landscaping, or signs in a manner that would result in useful light or spill light being cast beyond the boundaries of intended area to be lit.
- 4. The project will not install any highly reflective surfaces such as glare-producing glass or high-gloss surface color that will be visible along roadways, pedestrian walkways, or in the line of sight of adjacent properties.

The project will not contribute to significant cumulative impacts on day or nighttime views because the project will conform to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers, land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Therefore, compliance with the Code ensures that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level

In addition, the project's outdoor lighting is controlled through the Major Use Permit, which further limits outdoor lighting through strict controls. Therefore, compliance with the Code, in combination with the outdoor lighting and glare controls listed above ensures that the project will not create a significant new source of substantial light or glare.

II. AGRICULTURE RESOURCES -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency to non-agricultural use?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
as Primon the interval.	No Impact: The project site and surrounding area do not contain any lands designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, no Prime Farmland, Unique Farmland, or Farmland of Statewide will be converted to a non-agricultural use.			
b) (Conflict with existing zoning for agricultu	ıral us	e, or a Williamson Act contract?	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			

No Impact: The project site is zoned RR2 – Rural Residential which is not considered to be an agricultural zone. Additionally, the project site's land is not under a Williamson Act Contract. Therefore, the project does not conflict with existing zoning for agricultural use, or a Williamson Act Contract.

c)	Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				
		Potentially Significant Impact		Less than Significant Impact	
		Less Than Significant With Mitigation Incorporated	V	No Impact	
Disc	cuss	sion/Explanation:			
as F on t the	No Impact: The project site and surrounding area do not contain any lands designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, no Prime Farmland, Unique Farmland, or Farmland of Statewide will be converted to a non-agricultural use.				
арр	lica	QUALITY Where available, the sign ble air quality management or air pollutione following determinations. Would the	on cor	ntrol district may be relied upon to	
a)		Conflict with or obstruct implementation Strategy (RAQS) or applicable portions of		,	
		Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact	
ļ		Less Than Significant With Mitigation Incorporated		No Impact	
Disc	cuss	sion/Explanation:			
Less than Significant Impact: The project proposes development that was anticipated in SANDAG growth projections used in development of the RAQS and SIP. Operation of the project will not result in emissions of significant quantities of criteria pollutants listed in the California Ambient Air Quality Standards or toxic air contaminants as identified by the California Air Resources Board. As such, the proposed project is not expected to conflict with either the RAQS or the SIP. In addition, the project is consistent the SANDAG growth projections used in the RAQS and SIP, therefore, the project will not contribute to a cumulatively considerable impact.					
b)		Violate any air quality standard or contril projected air quality violation?	oute s	ubstantially to an existing or	
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less than Significant Impact: In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

The project proposes a group care facility consisting of 49 beds and associated uses. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in 56 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

, ;	which the project region is non-attainme ambient air quality standard (including requantitative thresholds for ozone precur	ent und eleasi	der an applicable federal or state ng emissions which exceed
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual

geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM_{10}) under the CAAQS. O_3 is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM_{10} in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Air quality emissions associated with the project include emissions of PM_{10} , NO_x and VOCs from construction/grading activities, and VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM_{10} and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 56 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM_{10} .

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O_3 precursors.

d)	Expose sensitive receptors to substantia	al poll	utant concentrations?
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: Air quality regulators typically define sensitive receptors as schools (Preschool-12th Grade), hospitals, resident care facilities, or daycare centers, or other facilities that may house individuals with health conditions that would be adversely impacted by changes in air quality.

e)

The project will introduce a new "sensitive receptors" into the project area, in a group care facility. However, based on consultation with DPLU staff air quality specialist, Mario Covic, and a site visit conducted by County Staff on August 1, 2005, the project is not located within a quarter-mile (the radius determined by the SCAQMD in which the dilution of pollutants is typically significant) of any identified source of significant emissions. Similarly, the project does not propose uses or activities that would result in exposure of these sensitive receptors to significant pollutant concentrations. In addition, the project will not contribute to a cumulatively considerable exposure of sensitive receptors to substantial pollutant concentrations because proposed project as well as the listed projects have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3.

Create objectionable odors affecting a substantial number of people?

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
•	No Impact: No potential sources of objectionable odors have been identified in association with the proposed project. As such, no impact from odors is anticipated.			
IV. BIC	DLOGICAL RESOURCES Would the	projec	t:	
, 	Have a substantial adverse effect, either on any species identified as a candidate ocal or regional plans, policies, or regulation and Game or U.S. Fish and Wildlife	, sens	itive, or special status species in , or by the California Department of	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				

No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, a site visit by County Staff on August 1, 2005, it has been determined that the site has been completely disturbed and contains no native vegetation or habitats. Therefore, no species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service would be expected to occur on-site.

,	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated	\checkmark	No Impact		
Discus	sion/Explanation:				
1, 2005 habitate Multiple Ordina Specie regulat within comprove direct comprove	pact: County staff biologist Christine Steps, and determined that the proposed project of other sensitive natural communities a Species Conservation Program, Counter, Natural Community Conservation Pact, Clean Water Act, or any other locations. In addition, no riparian or otherwise or adjacent to the area proposed for off-sements, utility extensions, etc. Therefore indirect impacts from development on community.	ect singles decired as	te does not contain any riparian fined by the County of San Diego an Diego Resource Protection ish and Game Code, Endangered egional plans, policies or sitive habitat has been identified pacts resulting from road project is not expected to have		
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?					
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated	\checkmark	No Impact		
Discus	sion/Explanation:				

No Impact: County staff biologist Christine Stevenson conducted a site visit on August 1, 2005, and determined that the proposed project site does not contain any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S., that could potentially be impacted through direct removal, filling, hydrological interruption, diversion or obstruction by the proposed development. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act in which the Army Corps of Engineers maintains jurisdiction over.

d)

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				
	Potentially Significant Impact Less Than Significant With Mitigation		Less than Significant Impact	
Ш	Incorporated	V	No Impact	
Discuss	sion/Explanation:			
No Impact : Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, and a site visit by County Staff on August 1, 2005, the site has been completely disturbed and contains no native vegetation or habitats. Therefore, impedance of the movement of any native resident or migratory fish or wildlife species, or established native resident or migratory wildlife corridors, or impedance of the use of native wildlife nursery sites would not be expected as a result of the proposed project.				
e) Conflict with the provisions of any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan or any other local policies or ordinances that protect biological resources?				
	Potentially Significant Impact	\checkmark	Less than Significant Impact	
	Less Than Significant With Mitigation Incorporated		No Impact	
Discuss	sion/Explanation			

Less than Significant Impact: Refer to the attached Ordinance Compliance Checklist, dated May 1, 2008, for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).

V. CULTURAL RESOURCES -- Would the project:

a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5?				
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Dis	cus	ssion/Explanation:		
His pre valuare Cou Ass pro and soil now Representations of the country of the co	tori ser ues hite unty soc jec jec an an an bis	than Significant Impact: The project site ic/Archaeological Landmark. The purpositive, and protect the historic, cultural, archaeologisted landmarks and districts are ectural design. Based on an analysis of rectural design. Based on a rehaeologist, Distates, it has been determined that there is at site. This resource includes Site CA-SE rehistoric component. The prehistoric component of milling features. The historic component is for the Country Gardens II Project Falls ared by Dennis Gallegos, with Gallegos & storical resource based on a review of his led information by Joyner and Noah (1985)	e of the aeological ending end	nis designator is to identify, gical and/or architectural resource courage compatible uses and as and a survey of the property by a Gallegos with Gallegos & historical resource within the 36/H, which consists of a historic ent is a habitation site with midden a 1920s reinforced concrete bridge, cort titled, "Cultural Resource California" dated December 2004 ciates, evaluated the significance of
The field survey relocated the bridge and determined that it is outside of the current project area. Based on the results of this study, it has been determined that the historic resource is not significant pursuant to the State of California Environmental Quality Act (CEQA) Guidelines, Section 15064.5. Moreover, if the resources are not considered significant historic resources pursuant to CEQA Section 15064.5 loss of these resources cannot contribute to a potentially significant cumulative impact.				
b)		Cause a substantial adverse change in t resource pursuant to 15064.5?	he sig	nificance of an archaeological
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: The project site has been surveyed by a County qualified archaeologist, Dennis Gallegos with Gallegos & Associates, and it has been

determined that there is one archaeological resource present. This resource includes one previously recorded cultural resource site (CA-SDI-11236H), which consists of a historic and prehistoric component. The prehistoric component is a habitation site with midden soil and milling features. The historic component is a 1920s reinforced concrete bridge, now closed to vehicle traffic. The field survey determined that only a small portion of CA-SDI-11236H is located within the Country Gardens II project area, at the southeast end. The prehistoric milling feature was relocated during the field survey, and consists of four bedrock milling features; however, previous grading has moved these features from their original location. No surface artifacts were located. An archaeological technical study titled, "Cultural Resource Report for the Country Gardens II Project Fallbrook, California" dated December 2004 prepared by Dennis Gallegos. with Gallegos & Associates. The report evaluated the significance of the archaeological resources based on a detail surface field survey, a review of the previous documented records, and other investigations and has determined that the archaeological resource is not significant pursuant to the State of California Environmental Quality Act (CEQA) Guidelines, Section 15064.5. Moreover, if the resources are not considered significant archaeological resources pursuant to CEQA Section 15064.5 loss of these resources cannot contribute to a potentially significant cumulative impact.

Directly or indirectly destroy a unique paleontological resource or site or unique

(geologic feature?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	sion/Explanation:				
of Natu potention	No Impact: A review of the paleontological maps provided by the San Diego Museum of Natural History indicates that the project is located on igneous rock and has no potential for producing fossil remains. Additionally, based on a site visit by County Staff on August 1, 2005, no known unique geologic features were identified on the property or in the immediate vicinity.				
•	Disturb any human remains, including th cemeteries?	nose ir	nterred outside of formal		
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

c)

No Impact: The project site has been surveyed by a County qualified archaeologist, Dennis Gallegos with Gallegos & Associates, and it has been determined that there is

one archaeological resource present that could contain interred human remains. This resource includes one previously recorded cultural resource site (CA-SDI-11236H), which consists of a historic and prehistoric component. The prehistoric component is a habitation site with midden soil and milling features. The historic component is a 1920s reinforced concrete bridge, now closed to vehicle traffic. An archaeological extended study titled, "Cultural Resource Report for the Country Gardens II Project Fallbrook, California" dated December 2004 prepared by Dennis Gallegos, with Gallegos & Associates, included subsurface excavations. No human remains were discovered during the course of these excavations. As outlined in CEQA Guidelines Section 15064.5, in the event that human remains are discovered during grading or construction of the project, the County will work with the appropriate Native Americans as identified by the Native American Heritage Commission (NAHC) as provided in Public Resources Code Section 5097.98 to ensure that all human remains will be appropriately treated or disposed of, with appropriate dignity, the human remains and any items associated with native American burials with the appropriate native Americans as identified by the NAHC.

VI. GEOLOGY AND SOILS -- Would the project:

a)	•	ese people or structures to potential of loss, injury, or death involving:	subs	tantial adverse effects, including the
	i.	Rupture of a known earthquake for Alquist-Priolo Earthquake Fault Z for the area or based on other sul Refer to Division of Mines and Ge	oning	Map issued by the State Geologist tial evidence of a known fault?
] Pot	entially Significant Impact		Less than Significant Impact
		ss Than Significant With Mitigation orporated	$\overline{\checkmark}$	No Impact

Discussion/Explanation:

a)

No Impact: The project is not located in a fault rupture hazard zone identified by the Alquist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California. No active or potentially active faults are known to exist at the site. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known hazard zone as a result of this project.

Discussion/Explanation:

ii	i.	Strong seismic ground shaking?			
	Less	entially Significant Impact Than Significant With Mitigation rporated		Less than Significant Impact No Impact	
Discuss	sion/E	xplanation:			
Building criteria, of a known propose that the addition Section Section recomm of a building	Less than Significant Impact: The Uniform Building Code (UBC) and the California Building Code (CBC) classifies all San Diego County with the highest seismic zone criteria, Zone 4. However, the project is not located within 5 kilometers of the centerline of a known active-fault zone as defined within the Uniform Building Code's Maps of Known Active Fault Near-Source Zones in California. The potential for damage to proposed structures from fault movement is considered low. However, it is anticipated that the site will experience some seismic shaking during the project lifespan. In addition, the project will have to conform to the Seismic Requirements Chapter 16 Section 162- Earthquake Design as outlined within the California Building Code. Section 162 requires a soils compaction report with proposed foundation recommendations to be approved by a County Structural Engineer before the issuance of a building or grading permit. Therefore, there will be no impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking as a result of this project.				
ii	ii.	Seismic-related ground failure, inc	cluding	g liquefaction?	
	Less	entially Significant Impact Than Significant With Mitigation rporated		Less than Significant Impact No Impact	
Discuss	sion/E	xplanation:			
No Impact: The geology of the project site is identified as granitic bedrock. This geologic environment is not susceptible to ground failure from seismic activity. The potential for liquefaction should be considered negligible due to the dense nature of the underlying Cretaceous Granite. Therefore, there will be no impact from the exposure of people to adverse effects from a known area susceptible to ground failure.					
i	V.	Landslides?			
	Less	entially Significant Impact Than Significant With Mitigation rporated		Less than Significant Impact No Impact	

No Impact: The site is not located within a landslide susceptibility zone. Therefore the potential for landslides or rockslides to affect the site is considered negligible.

b)	Result in substantial soil erosion or the loss of topsoil?					
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			

Discussion/Explanation:

Less than Significant Impact: According to the Soil Survey of San Diego County, the soils on-site are identified as Fallbrook-Vista sandy loams and Visalia sandy loams that have soil erodibility ratings of "severe" as indicated by the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. However, the project will not result in substantial soil erosion or the loss of topsoil for the following reasons:

- The project will not result in unprotected erodible soils; will not alter existing drainage patterns; is not located in a floodplain, wetland, or significant drainage feature; and will not develop steep slopes.
- The project has prepared a Stormwater Management Plan dated November 16, 2006, prepared by Skyline Engineering. The plan includes the following Best Management Practices to ensure sediment does not erode from the project site: Silt fencing; street sweeping and vacuuming; stockpile management; solid waste management; desilting basin; gravel bag berms; material delivery and storage; spill prevention and control; concrete waste management; water conservation practices.
- The project involves grading. However, the project is required to comply with the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING). Compliance with these regulations minimizes the potential for water and wind erosion.

Due to these factors, it has been found that the project will not result in substantial soil erosion or the loss of topsoil on a project level.

In addition, the project will not contribute to a cumulatively considerable impact because all the of past, present and future projects included on the list of projects that involve grading or land disturbance are required to follow the requirements of the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING); Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and

Discharge Control Ordinance (WPO) (Ord. No. 9424); and County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

c)	impacts resulting from landslides, lateral collapse?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	ssion/Explanation:				
unstak condu were r	No Impact: The project is not located on or near geological formations that are unstable or would potentially become unstable as a result of the project. On a site visit conducted by County Staff on August 1, 2005, no geological formations or features were noted that would produce unstable geological conditions as a result of the project. For further information refer to VI Geology and Soils, Question a., i-iv listed above.				
d)	Be located on expansive soil, as defined Code (1994), creating substantial risks t				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

Less than Significant Impact: The project is located on expansive soils as defined within Table 18-I-B of the Uniform Building Code (1994). This was confirmed by staff review of the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. The soils onsite are Fallbrook-Vista sandy loams and Visalia sandy loams. However the project will not have any significant impacts because the project is required to comply the improvement requirements identified in the 1997 Uniform Building Code, Division III – Design Standard for Design of Slab-On-Ground Foundations to Resist the Effects of Expansive Soils and Compressible Soils, which ensure suitable structure safety in areas with expansive soils. Therefore, these soils will not create substantial risks to life or property.

,	For a project located within an airport lar not been adopted, within two miles of a pathe project result in a safety hazard for parea?	oublic	airport or public use airport, would
	Potentially Significant Impact	\checkmark	Less than Significant Impact
	Less Than Significant With Mitigation Incorporated		No Impact
Discus	sion/Explanation:		

Less than Significant Impact: The project is located within a Comprehensive Land Use Plan (CLUP) for airports. However, the proposed project will not impact this area for the following reasons:

• The project will comply with Airport Land Use Compatibility Policies for the Fallbrook Community Airpark. The project site is located within Safety Zone 6 in

the Fallbrook ALUCP. In Safety Zone 6, residential development is not restricted. In addition, there is no limit to the intensity of non-residential development within Safety Zone 6.

- The project does not propose any distracting visual hazards including but not limited to distracting lights, glare, sources of smoke or other obstacles or an electronic hazard that would interfere with aircraft instruments or radio communications. Therefore, the project complies with the Federal Aviation Administration Runway Approach Protection Standards (Federal Aviation Regulations, Part 77 – Objects Affecting Navigable Airspace).
- The project does not propose construction of any structure equal to or greater than 150 feet in height, constituting a safety hazard to aircraft and/or operations from an airport or heliport.
- The project does not propose any artificial bird attractor, including but not limited to reservoirs, golf courses with water hazards, large detention and retention basins, wetlands, landscaping with water features, wildlife refuges, or agriculture (especially cereal grains).

Therefore, the project will not constitute a safety hazard for people residing or working in the project area.

	 or a project within the vicinity of a priva safety hazard for people residing or work 				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				
result, t	No Impact: The proposed project is not within one mile of a private airstrip. As a result, the project will not constitute a safety hazard for people residing or working in the project area.				
· ·	g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

Discussion/Explanation:

OPERATIONAL AREA EMERGENCY PLAN

Less Than Significant Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

No Impact: The Dam Evacuation Plan for will not be interfered with because the project is located outside a dam inundation zone.

h)

Expose people or structures to a significant risk of loss, injury or death involving

	wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?					
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discuss	sion/Explanation:					
Less than Significant Impact: The proposed project is adjacent to wildlands that have the potential to support wildland fires. However, the project will not expose people or structures to a significant risk of loss, injury or death involving wildland fires because the project will comply with the regulations relating to emergency access, water supply, and defensible space specified in the Consolidated Fire Code for the 17 Fire Protection Districts in San Diego County and Appendix II-A, as adopted and amended by the local fire protection district. Implementation of these fire safety standards will occur during the building permit process. A Fire Service Availability Letter and conditions, dated August 19, 2004, have been received from the North County Fire Protection District, and require the conditions set out in their letter of August 19, 2004, to be met. The Fire Protection Plan calls for the creation of minimal wildland-urban interface areas, fire access roads, a comprehensive fuel modification plan, adequate water supply, sprinkler system and landscaping requirements, Therefore, based on the review of the project by County staff, through compliance with the Consolidated Fire Code and Appendix II-A and through compliance with the North County Fire Protection District's conditions, it is not anticipated that the project will expose people or structures to a significant risk of loss, injury or death involving hazardous wildland fires. Moreover, the project will not contribute to a cumulatively considerable impact, because all past, present and future projects in the surrounding area required to comply with the Consolidated Fire Code and Appendix II-A.						
,	Expose people to significant risk of injury mosquitoes, rats or flies?	y or de	eath involving vectors, including			
Discuss	Potentially Significant Impact Less Than Significant With Mitigation Incorporated sion/Explanation:	□	Less than Significant Impact No Impact			
しいいしい	οιοι / Ελριαι ιαιίοι ι.					

No Impact: The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. lagoons, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Moreover, based on a site visit conducted by

County Staff on August 1, 2005, there are none of these uses on adjacent properties. Therefore, the project will not expose people to significant risk of injury or death involving vectors.

VIII. HYDROLOGY AND WATER QUALITY -- Would the project:

a)	Violate any waste discharge requirement	nts?			
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discussion/Explanation:					

l ess than Significant I

Less than Significant Impact: The project proposes grading and construction of a residential care facility, parking areas and landscaping, which requires compliance with the Watershed Protection Ordinance (WPO). The project applicant has provided a Stormwater Management Plan (Skyline Engineering, November 16, 2006) which demonstrates that the project will comply with all requirements of the WPO. The project site proposes and will be required to implement the following site design measures, source control BMPs and/or treatment control BMPs to reduce potential pollutants to the maximum extent practicable from entering storm water runoff: silt fencing; street sweeping and vacuuming, stockpile management; solid waste management; stabilized construction entrance/exit; desilting basins, gravel bag berms; material delivery and storage; spill prevention and control; concrete waste management; water conservation practices; and protection of minor slopes, created incidental to construction, by covering with plastic or tarp prior to a rain event, and with vegetation reestablished within 180 days of completion of the slope. These measures will enable the project to meet waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP).

Finally, the project's conformance to the waste discharge requirements listed above ensures the project will not create cumulatively considerable water quality impacts related to waste discharge because, through the permit, the project will conform to Countywide watershed standards in the JURMP and SUSMP, derived from State regulation to address human health and water quality concerns. Therefore, the project will not contribute to a cumulatively considerable impact to water quality from waste discharges.

May 15, 2008

, l	s the project tributary to an already imp Water Act Section 303(d) list? If so, coupollutant for which the water body is alre	uld the	project result in an increase in any
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: The project lies in the Bonsall hydrologic subarea, within the San Luis Rey hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2003, although the mouth of the San Luis Rey impaired for coliform bacteria, no portion of the San Luis Rey River, which is tributary to the Pacific Ocean, is impaired. Constituents of concern in the San Luis Rey River watershed include coliform bacteria, nitrate, sediment, and pesticides.

The project proposes the following activities that are associated with these pollutants: grading and construction of a residential care facility, parking areas and landscaping. However, the following site design measures, source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: silt fencing; street sweeping and vacuuming, stockpile management; solid waste management; stabilized construction entrance/exit; desilting basins, gravel bag berms; material delivery and storage; spill prevention and control; concrete waste management; water conservation practices; and protection of minor slopes, created incidental to construction, by covering with plastic or tarp prior to a rain event, and with vegetation reestablished within 180 days of completion of the slope . These measures will enable the project to meet waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP).

The proposed BMPs are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect

water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

C)	5	could the proposed project cause or consurface or groundwater receiving water peneficial uses?	• • • • • • • • • • • • • • • • • • •
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the Bonsall hydrologic subarea, within the San Luis Rey hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply; industrial service supply; freshwater replenishment; hydropower generation; contact water recreation; noncontact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; marine habitat; migration of aquatic organisms; and, rare, threatened, or endangered species habitat.

The project proposes the following potential sources of polluted runoff: parking lots, construction activities and landscaping, with potential pollutants generated including sediments, nutrients, trash and debris, oil and grease, oxygen demanding substances, bacteria and viruses and pesticides. However, the following site design measures, source control BMPs and/or treatment control BMPs will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed

project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: silt fencing; street sweeping and vacuuming, stockpile management; solid waste management; stabilized construction entrance/exit; desilting basins, gravel bag berms; material delivery and storage; spill prevention and control; concrete waste management; water conservation practices; and protection of minor slopes, created incidental to construction, by covering with plastic or tarp prior to a rain event, and with vegetation reestablished within 180 days of completion of the slope. These measures will enable the project to meet waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP).

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

groundwater recharge such that there was lowering of the local groundwater table existing nearby wells would drop to a leverter to the contract of the contrac	ould be leve	be a net deficit in aquifer volume or I (e.g., the production rate of pre- nich would not support existing land
Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
	groundwater recharge such that there was lowering of the local groundwater table existing nearby wells would drop to a levuses or planned uses for which permits Potentially Significant Impact Less Than Significant With Mitigation	Less Than Significant With Mitigation

Discussion/Explanation:

No Impact: The project will obtain its water supply from the Fallbrook Public Utility District that obtains water from surface reservoirs or other imported water source. The project will not use any groundwater for any purpose, including irrigation, domestic or commercial demands. In addition, the project does not involve operations that would interfere substantially with groundwater recharge including, but not limited to the following: the project does not involve regional diversion of water to another groundwater basin; or diversion or channelization of a stream course or waterway with impervious layers, such as concrete lining or culverts, for substantial distances (e.g. ½ mile). These activities and operations can substantially affect rates of groundwater recharge. Therefore, no impact to groundwater resources is anticipated.

May 15, 2008

e)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which we result in substantial erosion or siltation on- or off-site?			
	Potentially Significant Impact		Less than Significant Impact	
	Less Than Significant With Mitigation Incorporated		No Impact	

Discussion/Explanation:

Less Than Significant Impact: The project proposes to develop a currently undeveloped 2-acre site located on the northwest corner of S. Mission Road/Overland Trail in Fallbrook with a new 49 bed group care facility. As outlined in the Storm Water Management Plan (SWMP), dated November 16, 2006, and CEQA level preliminary Grading Plans and Drainage Study, dated June 22, 2007, prepared by David Zernick, P.E, of Skyline Engineering, Oceanside, the project will implement the following site design measures, source control, and/or treatment control BMP's to reduce potential pollutants including sediment from erosion or siltation from entering storm water runoff, to the maximum extent practicable: site design - minimize impervious areas; preservation of existing drainage patterns through use of engineered grading and pervious pavers; use of on-site vegetated swales; source control-including homeowner education, trash driveways and parking designed to reduce pollution; efficient irrigation and landscaping systems; and treatment control- grass swale. These measures will control erosion and sedimentation and satisfy waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP). The SWMP specifies and describes the implementation process of all BMP's that will address equipment operation and materials management, prevent the erosion process from occurring, and prevent sedimentation in any onsite and downstream drainage swales. The Department of Public Works will ensure that the Plan is implemented as proposed. Due to these factors, it has been found that the project will not result in significantly increased erosion or sedimentation potential and will not alter any drainage patterns of the site or area onor off-site. In addition, because erosion and sedimentation will be controlled within the boundaries of the project, the project will not contribute to a cumulatively considerable impact. For further information on soil erosion refer to VI, Geology and Soils, Question b.

f)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increas the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: According to preliminary Drainage Study, dated June 22, 2007, prepared by David Zernick, P.E, of Skyline Engineering, Oceanside, while a short segment of Ostrich Farms Creek, County-mapped floodplain runs past the project's southeast corner, the 100-year storm is confined to the existing banks of the Creek and the existing and proposed pad and building and Overland Trail private road lie above the floodway and are not subject to inundation. In addition, the project is not proposing to place structures with a potential for human occupation within these areas and will not place access roads or other improvements which will limit access during flood events or affect downstream properties.

k) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Dis	cuss	sion/Explanation:		
No Impact: The project site lies outside any identified special flood hazard area including a mapped dam inundation area for a major dam/reservoir within San Diego County. In addition, the project is not located immediately downstream of a minor dam that could potentially flood the property. Therefore, the project will not expose people to a significant risk of loss, injury or death involving flooding. I) Inundation by seiche, tsunami, or mudflow?				
',		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:				
i.	5	SEICHE		
No Impact: The project site is not located along the shoreline of a lake or reservoir; therefore, could not be inundated by a seiche.				

ii. TSUNAMI

No Impact: The project site is located more than a mile from the coast; therefore, in the event of a tsunami, would not be inundated.

iii. MUDFLOW

No Impact: Mudflow is type of landslide. The site is not located within a landslide susceptibility zone. Also, staff geologist has determined that the geologic environment of the project area is not located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity. In addition, the project does propose land disturbance that will expose soils and the project is not located downstream from exposed soils within a landslide susceptibility zone. Therefore, it is not anticipated that the project will expose people or property to inundation due to a mudflow.

IX. LAND USE AND PLANNING -- Would the project:

a)	Physically divide an established commu	nity?	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discu	ssion/Explanation:		
No Impact: The project does not propose the introducing new infrastructure such major roadways or water supply systems, or utilities to the area. Therefore, the proposed project will not significantly disrupt or divide the established community.			
b)	Conflict with any applicable land use pla jurisdiction over the project (including, b plan, local coastal program, or zoning or avoiding or mitigating an environmental	ut not dinan	limited to the general plan, specific ce) adopted for the purpose of
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		

Less than Significant Impact: The proposed project is subject to the Regional Land Use Element Policy (CT) County Town and General Plan Land Use Designation (3) Residential. The project is consistent with the General Plan because residential uses were anticipated by the (3) Residential Land Use Designation. The project is subject to the policies of the Fallbrook Community Plan, which has a goal of providing a variety of housing types to accommodate the forecast population increase while retaining the community's character. The proposed project is consistent with the policies of the Fallbrook Community Plan because grading will not unduly disrupt the natural terrain and the project would provide senior housing at a density and character compatible with

the adjacent neighborhood. The property is zoned (RR2) Rural Residential which permits major use permits proposing group care facilities pursuant to The Zoning Ordinance Section 2185b; therefore, the proposed project is consistent with plan and zone.

X. MINERAL RESOURCES -- Would the project:

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?			
	Potentially Significant Impact	\checkmark	Less than Significant Impact
Less Than Significant With Mitigation Incorporated			No Impact
Discuss	sion/Explanation:		
Less than Significant Impact: The project site has a history of mineral extraction. The project site was formally utilized as a granitic mineral borrow pit and has been excavated to nearly flat gradient for the majority of the project site. Although the project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego Production-Consumption Region, 1997) as an area of undetermined mineral resources MRZ-3, a staff geologist has reviewed the site's geologic environment and has determined that the site is not located within an alluvial river valley or underlain by coastal marine/non-marine granular deposits. Therefore, no potentially significant loss of availability of a known mineral resource of value to the region and the residents of the state will occur as a result of this project. Moreover, if the resources are not considered significant mineral deposits, loss of these resources cannot contribute to a potentially significant cumulative impact.			
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?			
	Potentially Significant Impact		Less than Significant Impact
	Less Than Significant With Mitigation Incorporated	V	No Impact
Discuss	sion/Explanation:		

No Impact: The project site is zoned RR2 – Rural Residential, which is not considered to be an Extractive Use Zone (S-82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000).

May 15, 2008

XI. NOISE -- Would the project result in:

a)	Exposure of persons to or generation of established in the local general plan or of other agencies?	of noise levels in excess of standards or noise ordinance, or applicable standards		
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less than Significant Impact: The project is a proposed group care facility consisting of a single-story building containing 27 specific use suites for 49 residents. Based on a site visit completed by County Staff on August 1, 2005, and as described in the Acoustical Analysis Report (Eilar Associates, January 3, 2006), the surrounding area supports RR2 and is occupied by residential use. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

General Plan - Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive area to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Based on an Acoustical Analysis Report (Eilar Associates, January 3, 2006), project implementation will not expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). Future noise environment is primarily the result of vehicle traffic traveling on South Mission Road. Without mitigation, future traffic noise levels at the proposed courtyard outdoor use recreational area will be 50.2 dBA CNEL which is well below the 60 dBA CNEL sound level limit. For exterior noise level details, refer to Section 5.0 Impacts and Mitigation in the Acoustical Analysis Report. Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Noise Ordinance - Section 36-404

Based on a Acoustical Analysis Report (Eilar Associates, January 3, 2006), non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The site is zoned RR2 that has a one-hour average nighttime sound limit of 45 dBA. The adjacent properties to the south are zoned A70 and C36. There are currently two proposed exterior mechanical units. These units are located near the

planned northern and southern building locations. Property line sound levels will be as high as 40 dBA at the eastern property line. For exterior mechanical unit details, refer to Section 4.1.4 Preliminary mechanical Plan Calculation in the Acoustical Analysis Report. Furthermore, the Southern AC unit at the northern property line and the Northern unit at the southern line will not be considered significant due to distance and shielding by the intervening buildings. Therefore, the proposed exterior mechanical units will meet the property line noise level limits of the County Noise Ordinance (Section36.404).

Noise Ordinance – Section 36-410

Based on the Acoustical Analysis Report (Eilar Associates, January 3, 2006), the project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-410). Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of an average sound level of 75dB between the hours of 7 AM and 7 PM. For construction details, refer to Section 5.4 Temporary Construction Noise in the Acoustical Analysis Report.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b) and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

,	Exposure of persons to or generation of groundborne noise levels?	exce	ssive groundborne vibration or
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes a group care facility where low ambient vibration is essential for interior operation and/or sleeping conditions. However, the facilities are typically setback more than 50 feet from any County Circulation Element (CE) roadway using rubber-tired vehicles with projected groundborne noise or vibration contours of 38 VdB or less; any property line for parcels zoned industrial or extractive use; or any permitted extractive uses. A setback of 50 feet from the roadway centerline for heavy-duty truck activities would insure that these

proposed uses or operations do not have any chance of being impacted significantly by groundborne vibration or groundborne noise levels (Harris, Miller Miller and Hanson Inc., *Transit Noise and Vibration Impact Assessment* 1995, Rudy Hendriks, *Transportation Related Earthborne Vibrations* 2002). This setback insures that this project site will not be affected by any future projects that may support sources of groundborne vibration or groundborne noise related to the adjacent roadways. Also, the project does not propose any major, new or expanded infrastructure such as mass transit, highways or major roadways or intensive extractive industry that could generate excessive groundborne vibration or groundborne noise levels and impact vibration sensitive uses in the surrounding area.

Therefore, the project will not expose persons to or generate excessive groundborne vibration or groundborne noise levels on a project or cumulative level.

,	A substantial permanent increase in am above levels existing without the project	noise levels in the project vicinity
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: vehicle traffic from South Mission Road and aircraft noise from Fallbrook Community Airpark. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on an Acoustical Analysis Report (Eilar Associates, January 3, 2006). Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an increase of 10 dB is perceived as twice as loud and is perceived as a significant increase in the ambient noise level.

The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

d)

A substantial temporary or periodic increase in ambient noise levels in the project

V	ricinity above levels existing without the	projed	ot?			
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discuss	sion/Explanation:					
substan includin that inve	Less than Significant Impact: The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting, drilling, grinding, or blasting of raw materials; truck depots, transfer stations or delivery areas; or outdoor sound systems.

r	For a project located within an airport lar not been adopted, within two miles of a p he project expose people residing or wo noise levels?	oublic	airport or public use airport, would			
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discuss	sion/Explanation:					

Less than Significant Impact: The proposed project is located within a Comprehensive Land Use Plan (CLUP) for airports or within 2 miles of a public airport or public use airport for the Fallbrook Community Airport. However, the project implementation is not expected to expose people residing or working in the project area to excessive noise levels in excess of the CNEL 60 dB(A). This is based on staff's review of projected County noise contour maps (CNEL 60 dB(A) contours) and Acoustical Analysis Report (Eilar Associates, January 3, 2006),. The location of the project is outside of the CNEL 60 dB(A) contours for the airport.

f١

In addition, based on the list of past, present and future projects there are no new or expanded public airports projects in the vicinity that may extend the boundaries of the CNEL 60 dB noise contour or CLUP. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Therefore, the project will not expose people residing or working in the project area to excessive airport-related noise on a project or cumulative level.

For a project within the vicinity of a private airstrip, would the project expose

airstrip area to	pact: The proposed project is not located; therefore, the project will not expose per excessive airport-related noise levels. OPULATION AND HOUSING Would t	eople	residing or working in the project
,	Induce substantial population growth in a proposing new homes and businesses) extension of roads or other infrastructure	or indi	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		

No Impact: The proposed project will not induce substantial population growth in an area because the project does not propose any physical or regulatory change that would remove a restriction to or encourage population growth in an area including, but limited to the following: new or extended infrastructure or public facilities; new commercial or industrial facilities; large-scale residential development; accelerated conversion of homes to commercial or multi-family use; or regulatory changes including General Plan amendments, specific plan amendments, zone reclassifications, sewer or water annexations; or LAFCO annexation actions.

No Impact

Discussion/Explanation:

Incorporated

Less Than Significant With Mitigation

Less than Significant Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities. Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts:

- Fallbrook Union High School District
- Fallbrook Union Elementary
- □ Fallbrook Public Utilities District Sewer and Water
- North County Fire Protection District

The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

XIV. RECREATION

a)	Would the project increase the use of exor other recreational facilities such that facility would occur or be accelerated?	_	• • • • • • • • • • • • • • • • • • • •
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves a residential group care facility that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to provide private recreational facilities. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts, including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO.

Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

With regard to regional recreational facilities, there are over 21,765 acres of regional parkland owned by the County, which exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive acreage of existing publicly owned lands that can be used for recreation, the project will not result in substantial physical deterioration of regional recreational facilities or accelerate the deterioration of regional parkland. Moreover, the project will not result in a cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant amount of regional recreational facilities will be available to County residents.

Discussion/Explanation:

Less Than Significant Impact: A Cumulative Traffic Letter Report (TLR), dated May 16, 2006, prepared by LOS Engineering is on file with the Department of Planning and

Land Use under Environmental Review Number ER 04-02-053, was completed for the proposed project. The Traffic Impact Study concluded that the proposed project will result in an additional 56 trips (ADT). The addition of 56 ADT project traffic is less than the County minimum criteria for direct impacts on road segments, or at intersections. Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system. Also refer to the answer for XV. b. below.

,	Exceed, either individually or cumulative established by the County congestion mor highways?	•	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant With Mitigation Incorporated: A Cumulative Traffic Letter Report (TLR), dated May 16, 2006, prepared by LOS Engineering is on file with the Department of Planning and Land Use under Environmental Review Number ER 04-02-053, was completed for the proposed project. The Traffic Impact Study concluded that the proposed project will result in an additional 56 trips (ADT) is less than the County minimum criteria for direct impacts on road segments, or at intersections. Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system.

However, the County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. This program is based on a summary of projections method contained in an adopted planning document, as referenced in the State CEQA Guidelines Section 15130 (b)(1)(B), which evaluates regional or area wide conditions contributing to cumulative transportation impacts. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet.

state, and federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates 56 ADT. These trips will be distributed on circulation element roadways in the unincorporated county that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will pay the TIF prior to obtaining building permits.

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			

The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:

PROJECT NAME	PERMIT/MAP NUMBER	PROJECT
TPM20683	TPM 20683	Subdivision
BROOKFALL	TPM 20824	Subdivision
OLIVEHILL AT&T	ZAP 03-035	Wireless
		Telecommunications
		Facility
SLAVEN, TPM, 2	TPM 20819	Subdivision
LOTS (OPEN)		
NS 301-02 AQUA HILL	P 05-011	Wireless
WATER TANK		Telecommunications
		Facility
Sprint Winterwarm	ZAP 00-139	Wireless
		Telecommunications
		Facility
Verizon Fallbrook	ZAP 00-139-01	Wireless
Major Use Permit		Telecommunications
Modification		Facility
Hill Ranch	AD 06-017	Administrative Permit
Pacifica Estates	TM 5510/ AD 06-045	Subdivision/
		Administrative Permit
Reid/ American Tower	ZAP 01-111	Wireless
		Telecommunications
		Facility

Discussion/Explanation:

Less Than Significant With Mitigation Incorporated: Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to traffic impact. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee in accordance with County Ordinance #9712. This fee is based on project location, and DPW approved estimate of project traffic generation (trip/day) and is payable prior to issuance of a building permit. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

c)	Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

Less Than Significant With Mitigation Incorporated: In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to Transportation and Traffic. However, mitigation has been included that clearly reduces these effects to a level below significance.

The proposed project generates 56 ADT. These trips will be distributed on circulation element roadways in the unincorporated county that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
